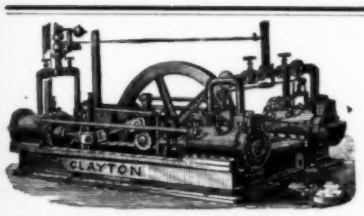
AND A MANUFACTURING AND TEXTILE PAPER, DEVOTED TO THE UPBUILDING OF SOUTHERN MANUFACTURES AND THE DEVELOPMENT OF THE MATERIAL RESOURCES OF THE SOUTH.

WEEKLY. $3.00 PER YEAR. | BALTIMORE, APRIL 26, 1884. | NEW SERIES, VOL. V. No. 11.

—MANUFACTURERS OF—
CARD CLOTHING
Of Every Description.
COTTON and WOOLEN MACHINERY.

JAS. SMITH & CO.
Works, 413 to 421 Race St., Cor. of Crown.
Office & Store, 137 Market St., Philadelphia.

—DEALERS IN—
Manufacturers' & Mill Supplies
Of Every Description.



Improved Duplex Air Compressor.

CLAYTON AIR COMPRESSORS
Rock Drills, Mining Pumps and General Mining Machinery,
For Catalogues, Estimates and Information, Address
CLAYTON STEAM PUMP WORKS, 45 & 47 York St., BROOKLYN, N. Y.

THOS. C. BASSHOR & CO.
28 Light Street, BALTIMORE, MD.

—MANUFACTURERS AND DEALERS IN—
Boilers, Engines, Pumps, Wrought-Iron Pipe, For Steam, Gas or Water.
Malleable and Cast Iron Steam Fittings,
Gas and Steam Fitters' Tools, Brass Work, Steam and Water Gauges, Steam and Hot-Water Heating Apparatus, &c.
SEND FOR ILLUSTRATED CATALOGUE.

ELEVATORS
Send for Illustrated Circular.

STEPHEN A. MORSE. C. M. WILLIAMS. EDWIN F. MORSE.
CLEM & MORSE,
Manufacturers and Builders of HYDRAULIC, STEAM, BELT and HAND-POWER, PASSENGER and FREIGHT ELEVATORS With most approved Safety Devices. Dumb-Waiters, Automatic Hatch-Doors, &c.
Sole owners of the right to apply the HEEBNER PATENT GOVERNOR to Elevators and Hoisting Machinery.
411 and 413 CHERRY STREET, PHILADELPHIA, PA. Branch Office, 108 Liberty Street, NEW YORK.

ROCK DRILLS, Air Compressors,
Machinery for Tunneling, Grading, Mining, etc.
Two Complete Tunneling Plants Furnished Northern Pacific R. R. Co.
For Catalogues, Estimates, &c., address,
INGERSOLL ROCK DRILL CO., 10 Park Place, New York.
MORTON, REED & CO., Agents, Baltimore.

LOVEGROVE & CO.
152 W. Third St., PHILADELPHIA, PA.
Engines, Boilers,
MACHINE & TOOLS.
Send for Circulars.

W. C. STEVENSON, Manufacturer of LOOM SHUTTLES and WEAVING REEDS,

Good Work. Low Prices. Quick Delivery.
For Cotton, Woolen, Silk, and Jute Mills. All Styles Patent Shuttles and Irons.
—LEICE REEDS AND ALL FINE REED WORK.—
PITTSFIELD, MASS.

TEXTILE MACHINERY.

THE BRIDESBURG MANUFACTURING CO.

MACHINE BUILDERS,

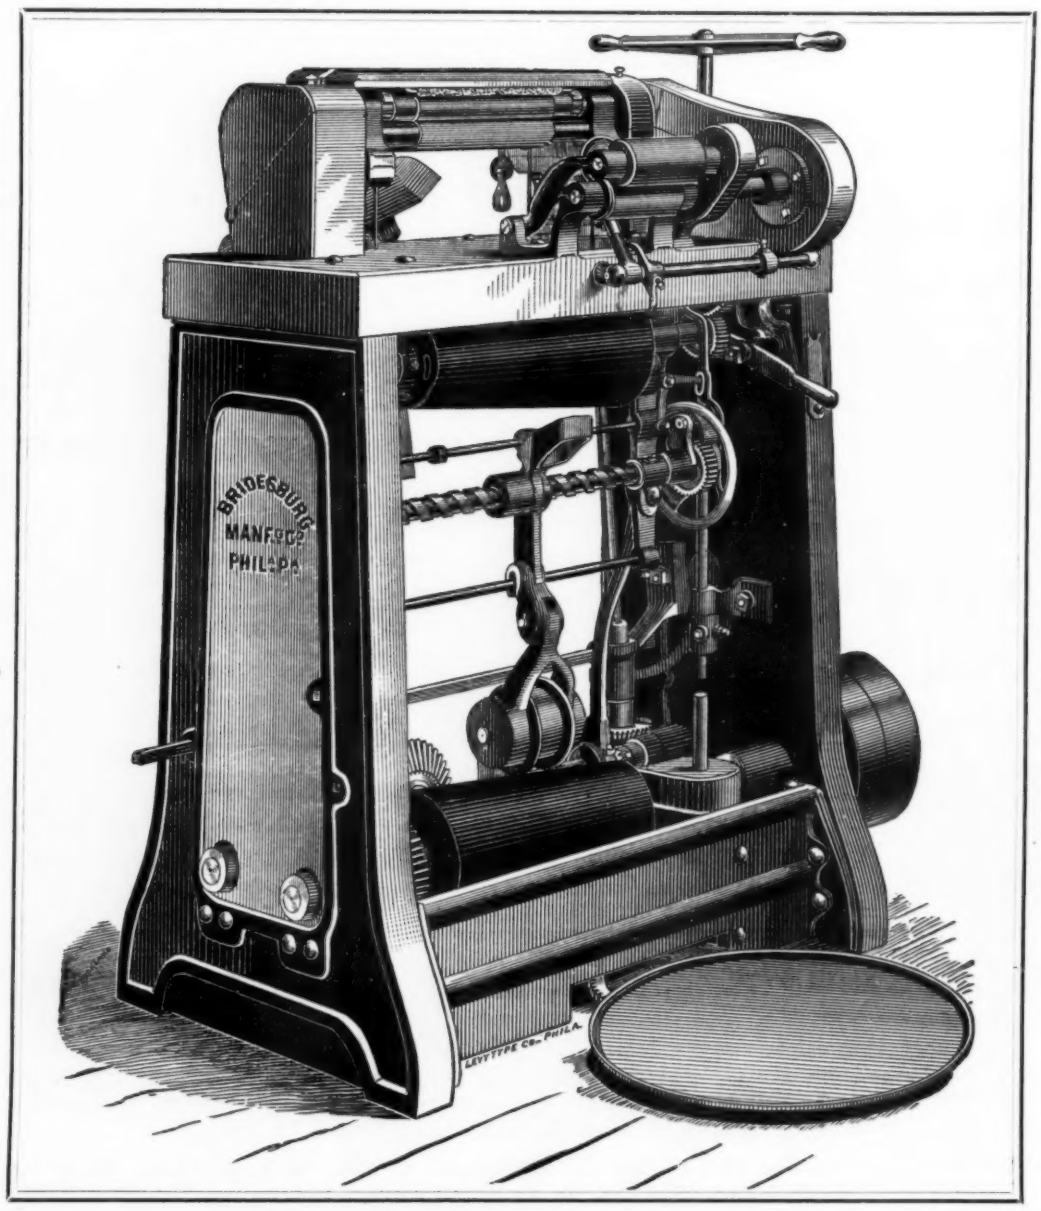
OFFICES, No. 201 CHESTNUT ST., PHILADELPHIA.

CARDING, SPINNING, WEAVING,

And all other Machinery used in Cotton and Woolen Factories.

—ALSO—

Builders of the Foss & Pevey Under-Flat and All-Iron Roller Cards.



POWER-SAVING RING SPINNING,

With Excelsior, Sawyer, Rabbeth, Birkinhead, or any of the approved Patented Spindles. The Excelsior Spindle drives the Bobbin positively and will run at any required velocity.

Self-Acting Mules for Wool,

All recent additions and improvements.

LOOMS

For Cotton, Jean, and Worsted Goods, and recently improved and superior *Drop-box Looms,* with patent full lift and full drop, skip-box motion and parallel pick, for Ginghams and Dress Goods.

STOCKTON BATES, President. JOHN ROMMEL, Jr., Vice-President. JOHN ROMMEL, 3d, Secretary and Treasurer.

☞ *Estimates for Mills and Plans for same, with all details, furnished by the best Mill Engineers, at reasonable prices.* ☜

LOWELL MACHINE SHOP,

LOWELL, MASS.

BUILDERS OF

COTTON MACHINERY

OF EVERY DESCRIPTION.

Lappers, Cards, Top Grinders, Lap Winders, Railway Heads, Drawing Frames.

LOWELL SPEEDERS OR ROVING FRAMES.

Fly Frames, Ring Spinning Frames, Filling Winders, Spoolers, Warpers, Twisters, Reels.

SELF-ACTING MULES.

Cylinder Slashers. **L. M. S. Patent Hot-Air Slashers.**

LOOMS

ELEVATORS, SHEARING MACHINES, BRUSHING MACHINES, SEWING MACHINES, CLOTH FOLDERS, CLOTH-STAMPING MACHINES, SIZE KETTLES, SIZE PUMPS, INDIGO GRINDERS, DRAWING-IN FRAMES, SHAFTING and GEARING.

☞Plans and Estimates Furnished on Application. ☞Correspondence Solicited.

WM. A. BURKE, Treasurer, 28 State Street, Boston. CHAS. L. HILDRETH, Superintendent, Lowell, Mass.

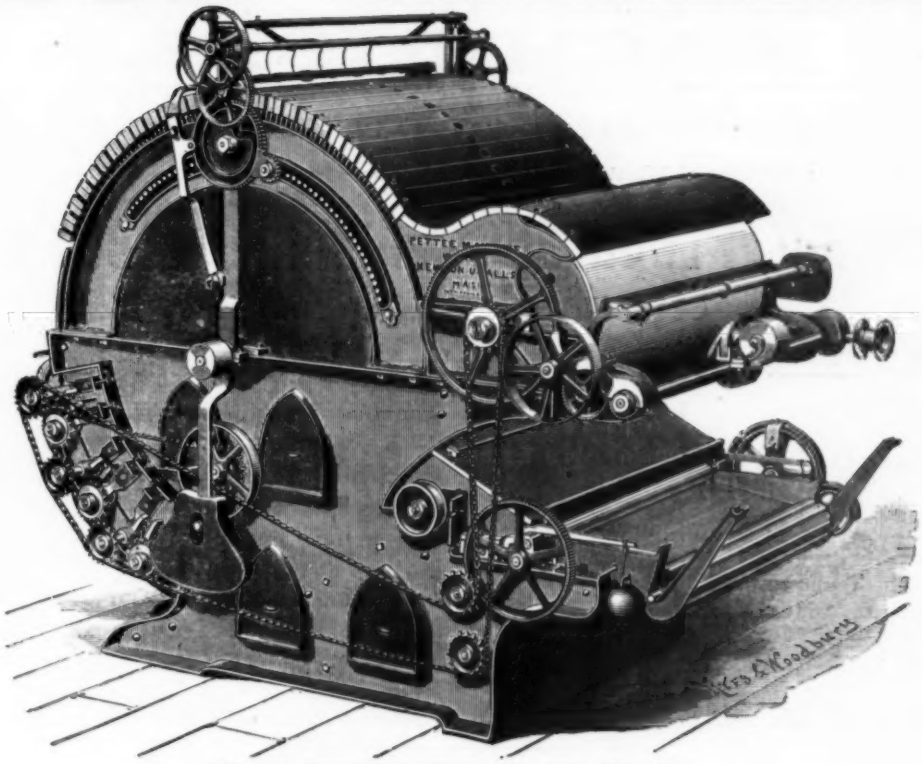
ESTABLISHED IN 1831.

PETTEE MACHINE WORKS, Newton Upper Falls. Mass.

BUILDERS OF

COTTON MACHINERY.

Plans and Estimates Furnished.



Correspondence Solicited.

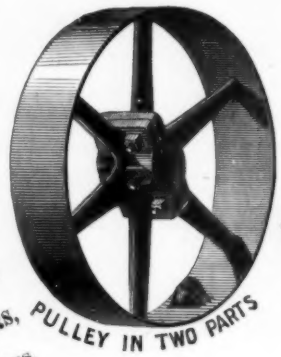
New Combination Cotton Card.

New Combination Cards, (48 in. diameter cylinder, 18 in. doffer,) Common Top Flat and Foss & Pevey Cards, Railway Heads, Railway Troughs, Drawing Frames; also *PATENT SPEEDERS* and *LOOMS* for goods ——from twenty-eight to sixty inches wide, plain or twilled.——

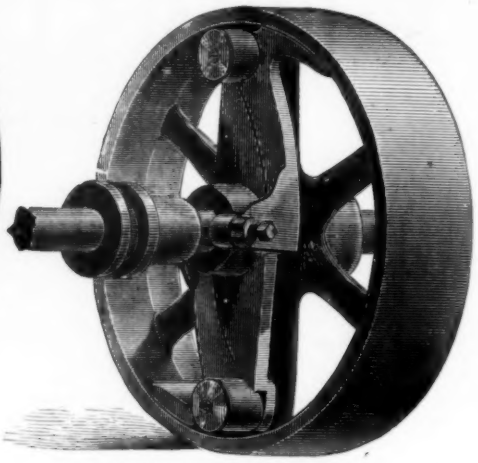
HENRY BILLINGS, Prest. **R. B. DALY, Supt.** **R. P. SNELLING, Treas., 40 Water St., Boston.**

ADJUSTABLE SELF-OILING HANGER.

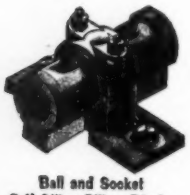
FAIRMOUNT MACHINE WORKS.
Office, 2106 Wood St., Philadelphia.
THOMAS WOOD,
Manufacture as Specialties
Power Looms, Patent Robbin or Quill Winding Machines, Plain and Presser Beaming Machines, Plain and Presser or Spooling Machines, Dyeing, Reeling, Warp Splitting, Scouring, Fulling and Calendering Machines,
WARPING MILLS,
16, 18 and 20 yards Circumference,
WITH IMPROVED HECKS.
SHAFTING,
With Patent
ADJUSTABLE SELF-OILING HANGERS,
8, 10, 12, 15, 18, 20, 24 and 30 in. drop.
Also WALL, POST AND GIRDER HANGERS.
Pulleys, from 4 inches to 10 feet in diameter.
PATENT FRICTION PULLEY.
Pulleys in two parts, any size required.
PATENT HOISTING MACHINES.
Oil Presses for Lard, Fish and Paraffine.



PULLEY IN TWO PARTS



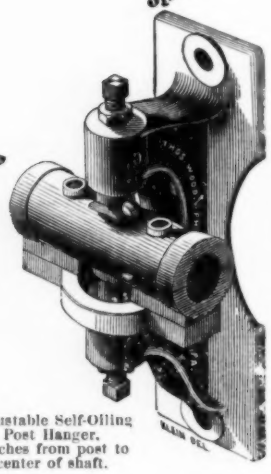
PATENT FRICTION PULLEY.
Simple, reliable and very durable. Suitable for any kind of driving, they serve equally well as driver or driven.



Ball and Socket Self-Oiling Pillow Block.

Special Driving,
such as Angular, Muley, and Gallows Driving, furnished for any position where possible to transmit power by belts.
PULLEYS from 4 inches to 10 feet in diameter.

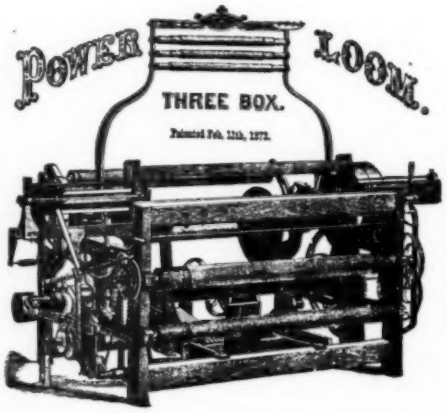
DOUBLE-BRACED ADJUSTABLE SELF OILING HANGER.



Adjustable Self-Oiling Post Hanger. 6 inches from post to center of shaft.

Why use old style Bearings, that require oiling every day, when you can get Bearings at less cost that only require oiling once in Six Months, and thus save oil and labor enough to pay for the bearings in use. Test the matter for yourselves; a trial always secures the trade.

ADDRESS,
THOS. WOOD,
Office, 2106 Wood St.
PHILADELPHIA, PENNA., U. S. A.



PLATT BROTHERS & CO.

(LIMITED,)

MACHINISTS,

HARTFORD WORKS, OLDHAM, LANCASHIRE,

Beg to Call the Attention of Worsted Spinners and Manufacturers to their Improved Machinery for

Carding, Combing, Preparing, Spinning AND Weaving Worsted

ON THE FRENCH SYSTEM.

PLATT BROTHERS & CO., Limited, are also Makers of the following Machinery:

New Patent Cleaning Machines for Cotton.
Crighton's Patent Opening Machines for Cotton.
Hard Waste Breaking-up Machinery.
Patent Burring Machines for Wool.
Machinery for Preparing, Spinning and Doubling Cotton, Wool, Worsted and Silk.
Ring Spinning and Doubling Machines.
Combing Machines for Cotton—Heilman's or Whipple's Patent.
Patent Brick-making Machinery.
Combing Machines for Wool, Worsted, &c.—Little & Eastwood's Patent.
Machinery for Carding and Spinning Silk Waste.
Power Looms for all Descriptions of Plain and Fancy Cloths in Cotton and Wool.
Sizing, Dressing, Warping, Beaming, Winding, and Reeling Machinery.
Cloth-folding and Measuring Machines.
Hydraulic and Cam Bundling Presses for Yarn and Cloth.

Also, Makers of PATENT MACARTHY COTTON GINS, Hand or Power, for long or short stapled Cottons.

FOR FURTHER INFORMATION AND PRICES APPLY TO

SAMUEL WOOD, Agent, 34 LETITIA ST., Philadelphia.

Agent for Thompson & Co.'s English Card Clothing.

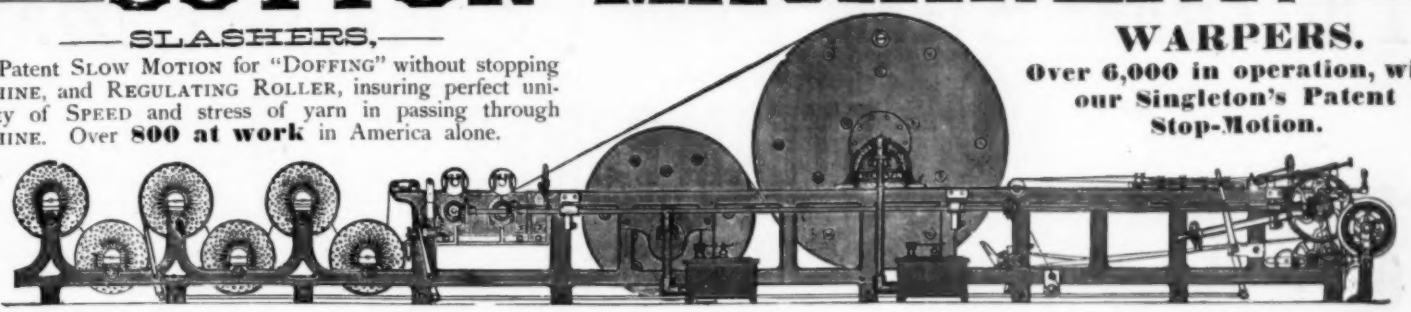
COTTON MACHINERY.

SLASHERS,

with Patent SLOW MOTION for "DOFFING" without stopping MACHINE, and REGULATING ROLLER, insuring perfect uniformity of SPEED and stress of yarn in passing through MACHINE. Over **800 at work** in America alone.

WARPERS.

Over 6,000 in operation, with our Singleton's Patent Stop-Motion.



SPECIALTIES—Openers and Lappers, Cards, Drawing, Slubbing, Intermed ate and Roving Frames, Patent Electric Stop-Motion, already applied to near **8,000** delivery heads of Drawing, and **50,000** Intermediate Spindles for preventing "Single;" Ring Spinning and Twisting Frames, the latest and best improvements; Self-acting Cotton and Woolen Mules; Patent Revolving and Traversing Yarn-Beam Pressers for Slashers; Card Clothing, in Leather, Rubber and Cotton; Spindles, Flyers and Fluted Rolls, Looms, etc., etc.

HOWARD, BULLOUGH & RILEY,

MILL ENGINEERS, ARCHITECTS. Plans and Estimates on Request. 19 Pearl Street, BOSTON. CORRESPONDENCE SOLICITED.

STEEL WIRE

A Specialty.

T. K. EARLE MANUF'G COMPANY,

Worcester, Mass.

Improved Centrifugal HYDRO-EXTRACTORS

Machine A.

For Silk Dyers, with Vertical Engine on the side and Cone Pulley Friction.

Machine B.

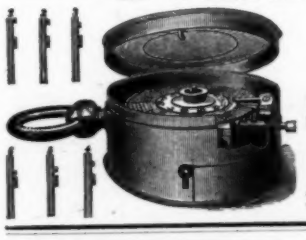
For Wool and Cotton Dyers, with direct-acting Steam Engine.

Machine C.

Runs by Belt and Friction Cones, suitable for water-power.

Three Sizes of Each Kind built by **W. P. UHLINGER,** Nos. 26 to 48 East Canal St., Philadelphia, Pa.

BUERK'S WATCHMAN'S TIME DETECTOR.



IMPORTANT FOR ALL LARGE CORPORATIONS AND MANUFACTURING CONCERNS.

Capable of controlling with the utmost accuracy the motion of a watchman or patrolman as the same reaches different stations of his beat. The instrument is complete in itself, portable, and as reliable as the best lever watch. It requires no fixture or wires communicating from room to room, as is the case with ordinary watch clocks.

The Instrument will in all Cases be Warranted Perfect and Satisfactory.

P. O. Box 2470. J. E. BUERK, Proprietor, No. 230 Washington St., BOSTON, MASS.

MOSHELEY'S CELEBRATED MOLLIS OIL.

It is a splendid lubricator for Stationary Engines, Printing Presses, Paper Mills, Saw Mills, Cotton and Woolen Mills, Spindles, &c. It is the *cheapest* and *best* Oil for Machinery, Harness, Belts, Boots and Leather generally. Warranted a Water-Proof Leather Preservative. It is penetrating, and renders soft and pliable the hardest leather.

Fire-Proof, Barn, Fence, Bridge and Roof Paint

MIXED READY FOR USE.

Our Fire-Proof Barn, Fence, Roof and Bridge **PAINT** is unsurpassed for painting exposed surfaces, such as Tin, Iron or Wood Roofs, Wagons, Farm Implements, Fences, Barns, Cars, &c., &c. It is mixed ready for use, will not settle, will be found convenient, saving labor and time, and at the same time is handsome and durable. ☞SOLD IN ALL-SIZED PACKAGES FROM 1 to 50 GALLONS.

Prices Mailed on Application. HIRSHBERG, HOLLANDER & CO., 195, 197, 217 and 240 W. Pratt St., Baltimore.

BALTIMORE, APRIL 26, 1884.

CORRESPONDENCE relating to the manufacturing, mining, lumbering and all other material interests of the Southern States is solicited. We invite those interested in the development of the South to make free use of our columns. Reaching so many capitalists in all parts of the United States seeking profitable investment in the South, the MANUFACTURERS' RECORD offers an excellent chance for the people in that section to place the advantages of each locality before those likely to be interested. We will take great pleasure at all times in telling what has already been accomplished in the South, and showing up the opportunities of doing still more,—so if you desire to attract immigration or capital, or if you know of an opening for profitable investment in manufacturing, mining or kindred pursuits, write us an account of it. It will be published free of cost.

MR. B. B. DAVIS, of Eufaula, Ala., writes to the Bulletin, of that city, that he "learns that parties are about testing the adaptability of the sands of our State for the making of glass, for the purpose of utilizing the great supply of gas furnished by the wells of our own State. Others are boring wells, confident of obtaining oil."

THE property of the Allentown Iron Co. will be sold out under foreclosure proceedings by the bondholders. Prior to 1873 this company was very prosperous, paying large dividends, but it never fully recovered from the panic, and of late years has paid no dividends.

Our readers will confer a favor upon our advertisers and upon us, as well as benefit themselves, if, whenever they write to anyone advertising in this paper, if it is only for a catalogue, they mention that "your advertisement was seen in the BALTIMORE MANUFACTURERS' RECORD." A careful compliance with this request will be much appreciated.

Railroad Building in the South.

The outlook for railroad building at the South promises great activity, and, despite the restrictions imposed upon railroad operations by several of the Southern States, the prospect is very encouraging for an unusually large amount of track-laying in the aggregate, though in some of the States not much will be done until the unwise railroad laws now in force are either modified or repealed. The limit of profitable railroad extension in the South will not be reached for many years, and no more inviting field for the building of new roads can be found than in that section. There are vast mineral, timber and agricultural resources, as yet totally undeveloped,—their extent and richness being only partly comprehended. As new roads are built, opening up to the world these immense sources of wealth, outside capital will be drawn to the development of the South in even greater abundance than at present. A careful study of the industrial position of the South, its resources and prospects, will convince any one that we have only seen the beginning of the great development of that section. Looking at some of the most potent factors in the South's progress, we find that it possesses a combination of advantages that is truly surprising. Its climate is most excellent,—offering, according to the locality, every degree of change from temperate to tropical; its healthfulness will compare most favorably with any country in the world; its agricultural possibilities are unsurpassed, and nowhere can the farmer who understands his business be more sure of success; while the wide diversity of productions is unequalled by any other section; its advantages for manufacturing are attracting the attention of the whole business world; while its mineral wealth is so vast that it is now an assured fact that the South is to be the great coal and iron centre, not simply of America, but of the world.

Appreciating these facts as Northern and foreign capitalists are beginning to do, we need not wonder at seeing so many of them turning their attention to the South and uniting with the people of that country in developing these boundless resources. This is why there is now so much activity in the projection and building of new roads, the extension of old ones, and the construction of connecting links and branch lines. Many of the railroad projects now being successfully worked out at the South are of great extent, involving the outlay of millions, and others of equal importance are gradually assuming shape, while there are others which, though of less extent and less costly, yet are destined to be of great value, as they will open up new lines of traffic and bring into the market immense tracts of coal, iron and timber lands.

The remarkably low cost of steel rails and other railroad materials makes the present a most excellent time for railroad building, and the South will probably never have a more favorable opportunity for increasing her railroad mileage than during 1884.

India as a Wheat Competitor.

Some years ago we had occasion to study the condition and future prospects of the world's grain trade, and it was deeply impressed upon us then that India would become a very close competitor with the United States for supplying wheat to the European markets. This competition is now upon us, and the vantage ground which we once held in the world's wheat markets is no longer ours. That India can produce wheat at a much lower cost than American farmers can, no longer admits of a doubt; and, moreover, there is no chance for bringing the first cost of wheat in this country down to India's level, unless we are prepared to see American farmers and farm laborers living as their India competitors do—in hovels instead of houses, and with only a few cents a day to purchase food and clothes for their families. Thus in the cost of production of wheat India has the advantage, and she will retain it. In view of these facts and of the prospective gradually diminishing foreign demand for our wheat, it becomes of greater importance than ever before to build up a home market for our agricultural products.

Free trade would destroy many of our manufacturing and mining industries, and drive thousands of workmen into agricultural pursuits, while it would force others to live on the barest necessities. The farmer would, therefore, find his business cut into in two ways. An increased number of farmers would produce far larger grain crops than are now gathered, thus overstocking the market, while the decrease in the number of mechanics and the reduced purchasing power of those that still remained at work would cause disastrously low prices for farm products. It is folly to talk of free trade enabling American farmers to compete with India in the cost of wheat production. It could not do so.

As opposed to the disastrous effects of free trade, a protective tariff will continue to build up our industrial interests and steadily enlarge the home demand for agricultural products. Hence the farmer is as deeply concerned in protection as the manufacturer.

THE Wall Street News hears of a Cincinnati reporter who went down South to feel the political pulse of the people. When he reached Birmingham, Ala., he asked a policeman for the whereabouts of a free trader who would be apt to "pan out" on an interview. The officer walked him over to a second, and the second passed him to a third. The third was walking him to the city limits, when the reporter inquired: "Does he live far from here?" "Live? Why the man is dead!" "Dead?" "Certainly, I thought you wanted to see the tree on which he hung himself. He got so lonesome here that he even spoiled a good harness to get rope to choke himself with."

The Extension of the Valley Road.

The people of southwest Virginia are deeply interested in the extension of the Valley Road from Lexington to Roanoke or to Salem, and thence on down through the State, while in North Carolina there is equally as much interest in having this road built through that State. We consider the extension of this line the most promising railroad enterprise now before the people of Baltimore, and unless this work is done the trade of this city will undoubtedly suffer. It is true that by means of our excellent Western Maryland Railroad connections with the Shenandoah Valley Road we have direct communication with a large Southern territory, yet the ground is by no means fully covered. There is room for many more railroads in the South, and it is important that Baltimore business men should realize the necessity of taking a hand in the railroad development of that section.

Unfortunately, the capitalists of this city have taken too little interest in the industrial progress of the South, and, instead of the Southern people looking to this city as the centre of financial and business interests for their section, we find that Philadelphia, New York and Boston hold this position. One of the first moves to be made, if Baltimore is to become the great centre of Southern trade, is for our capitalists to develop new railroad facilities between this city and the South. The rapid progress of railroad building in the South suggests the necessity for prompt action by Baltimore before the great highways of future traffic are under the control of other cities. If the Valley road is to be extended let us do so, and push it on down to Atlanta, and thus open up a country marvellously rich in undeveloped resources.

IN speaking of the newly discovered tin mine at King's Mountain, N. C., the Charlotte Observer says that a shaft has been sunk twenty-three feet, showing the continuance of the vein, as well as of the accompanying wall, as far down as the bottom of the shaft. On a line about north, thirty degrees east, for some six hundred yards, this vein has been uncovered at five distinct points, the vein showing about the same degree of thickness as the vein at the shaft and the same general dip and direction. At a point fifty yards west of the main vein, off-shoots have been uncovered as at first indicated.

By one of these a shaft has been sunk for twenty feet, and the ore taken from it analyzed by Dr. Dabney, State chemist,—the specimen being taken from the vein by himself, as a representative piece of ore, the better to determine its character,—showed sixty-two per cent. of pure metallic tin, and containing only a trace of sulphur and no arsenic. This analysis was made the 31st day of March, the main vein not having been found at that time. The ore in the main vein seems to be identical with that found in the off-shoot, except that it is embedded in quartz of more solidity, decomposition not having affected it.

CONSTRUCTION DEPARTMENT.

We publish, every week, a list of every new factory, of whatever kind, projected anywhere in the South; every railroad undertaken, and every mining company organized. This information is always fresh, and, by enabling manufacturers to correspond with the projectors of such enterprises before their supplies of machinery have been purchased, is of great value. Manufacturers will find it to their interest to read this department carefully each week.

Wm. N. Eddy's flour mill at Winchester, Va., will be changed to a roller mill.

Ludden & Bates, of Savannah, will soon establish a piano factory.

Antoine Moresi will build an ice factory at Jeannerette, La.

H. E. Graves will build large tobacco factory at Bristol, Tenn.

The Locust Point Land Co. of Baltimore will push work on the machine shops previously reported to be built for the H. A. Ramsay Co. Buildings will be extensive and fitted with best machinery; several hundred hands to be employed.

The Steward Heat and Light Co. of Balmore has been incorporated by A. W. Bostwick, L. K. Bartlett, Charles G. Cary and others. Object is to manufacture gas for heating and lighting villages, factories, churches, &c.

The Refugio Gold and Silver Mining Co. of Nashville, Tenn., will work a silver mine in Mexico.

Chartered—The Natauga Silver Mining Co. of Nashville, Tenn., by Henry E. Colton and others.

Incorporated in Johnson City, Tenn.—The Johnson City Foundry and Machine Works. Capital stock about $30,000.

The Nashville Trunk Manufactory has been organized in Nashville, Tenn., with W. C. McCann, secretary and treasurer.

The buildings for the Waco Woolen Mill, Waco, Texas, are nearly finished, and the machinery will soon be put in. About $150,000 will be the cost of buildings and machinery.

A tinware manufactory is to be started at Milton, Fla., and an ice factory at Daytona, in the same State.

The Louisiana Manufacturing and Cooperage Co., capital $50,000, has been organized in New Orleans to manufacture, with steam machinery, staves, hoops, general wood-work, &c. John B. Meyers is president, Philip Hirsch vice-president, and James T. Rodd secretary.

Reported that Northern capitalists will build cotton factory near Lockville, Chatham county, N. C.

Col. M. McRae and Alexander McRae have bought the "McLean Mill," near Shoe Heel, N. C., and will improve and operate it.

Wm. J. Hooper & Son, of Baltimore, large cotton manufacturers, have purchased the Mountain Island Cotton Mills, in North Carolina, for $125,000. They will enlarge mill capacity and probably spend about $75,000 for machinery.

Machinery of Roanoke Barrel-Heading Works, Tarboro, N. C., damaged by boiler explosion.

The Willow Brooke Manufacturing Co., High Point, N. C., are increasing their cotton machinery.

The Apalachicola & Alabama Railroad Co. has been organized to build a road 130 miles long, from Apalachicola, Fla., to some point in Alabama.

Cotton-factory project at Trenton, Tenn., previously reported, has been incorporated as "The Trenton Cotton Mills." The charter members of the company are: J. W. Hays, J. M. Senter, J. W. Elder, S. J. Taylor, J. A. Landis, Spl. Hill, M. C. Holmes, N. S. McRea and T. J. Happell. Money subscribed and ready now to negotiate for machiney.

A steam brick-yard is to be started at Owensboro, Ky.

Dr. Sloggett and Mr. — Dillingham, of St. Augustine, Fla., will put up a saw-mill.

The Roanoke Machine Works, Roanoke, Va., will prepare to manufacture car-wheels, as well as all parts of cars and locomotives.

A $3,000,000 mining, manufacturing and smelting company has been organized in Kentucky by Col. J. M. Andrick of Colorado, R. N. Robbins, F. S. Hastings, and others. The company has purchased large bodies of land in West Virginia, in which, it is said, there are found immense quantities of tin, coal, quicksilver, &c.

Smith, Mitchell & Co., Ashland, Ky., are at work building their saw-mill.

The Kanawha Woolen Mills Co., Charleston, W. Va., are at work on the enlarge ment of their building; previously mentioned.

A $12,000 Episcopal Church will be built in Charleston, W. Va.

The capital stock of the Durham Woolen Mills, Durham, N C., lately organized as reported, has been increased from $30,000 to $50,000.

The Fort Worth (Texas) and Southwestern Road is to be built at once to Brownwood.

The Houston, East & West Texas Railway is to be extended to Shreveport, La.

W. W. & J. C. Davis, North East, Md., are erecting an additional saw mill.

The Phillips & Buttorf Manfg. Co, of Nashville, Tenn., have added $250,000 to their capital to build the new stove foundry at Birmingham; previously reported.

Col. John T. Milner, of Milner, Caldwell & Flowers, lumber dealers, at Bolling, Ala., will build a fine saw mill in Mobile, Alabama.

J. J. Gibson, of Marshall, Tex., will build a $26,000 court-house at Center, Shelby county, Tex.

J. T. Brown & Co., Marshall, Tex., have received contract to erect a $27,000 court-house at Carthage, Tex.

A company is forming at Comanche, Tex., to build a flour mill.

A large storage warehouse and cotton compress are to be built at Helena, Ark. Reported that Berton & Johnson, of that city, are interested.

The company mentioned last week as organizing to buy the Pulaski Cotton and Woolen Mill, Pulaski, Tenn., has been chartered, with a capital of $100,000.

Manwell & Crabtree, Newberne, N. C, whose machine shops were lately burned, will rebuild at once.

The Cranberry Iron and Coal Co, of Cranberry, N. C., have just blown in a new furnace, and are contemplating the building of others.

F. W. Siddon, H. M. McNutt, Jos. F. Johnson, of Birmingham, and others, have organized a $200,000 company, to build foundry in Atlanta, Birmingham, Selma or Sheffield, to manufacture grates, mantels and hollow-ware.

Herbert Tanner, of Selma, Ala., and B. H. Craig have purchased large flour mills at Rome, Ga., and will operate them.

The Penrod Railway and Mining Co. has been organized; capital stock, $50,000. President, R. S. Bevier; H. C. Gans, secretary and treasurer;—both residing in Owensboro, Ky., where the office of the company is and will be. The company owns coal lands in Muhlenberg county, Ky, near the Owensboro & Nashville Railway, and adjoining the celebrated Mud River Coal Mines, which in Western Kentucky is the best bituminous coal produced.

Only $20,000 is needed to complete the subscriptions for a $300,000 cotton mill at Roanoke, Va., previously mentioned. L. H. Cocke, Roanoke, can give particulars.

The Capital Brewing Co. has been organized at Frankfort, Ky., with a capital of $70,000, by Sig. Luscher, Lewis Weitzel, and others.

A stock company has been organized and ground purchased in Jackson, Tenn., for building a hub and spoke factory.

Dr. Jas. A. Butner, of Salem, N. C., is preparing to build his new tobacco factory, previously reported.

Dennis & Sterling, Orlando, Fla., are pushing work on their furniture factory buildings.

W. C. Turner, Milan, Tenn., will build a cotton-seed oil mill.

August Kling, Mobile, Ala., is rebuilding his foundry, lately burned, as rapidly as possible.

Organized at Kingston, Tenn.—The Kingston Spoke and Felloe Co., G. A. Guenther president, and Otto M. Adae secretary,—previously reported.

E. Evans is building saw mill at Rockwood, Tenn.

Some prospect of new boiler works at Calera, Ala.

The Junction City Irrigating Co., Junction City, Texas, will build a canal about 8 miles long.

P. J. Kennedy, of New Orleans, will build water works for Shreveport, La.

Reported that a large coke furnace will be erected at Talladega, Ala.

Bones & Co., Rome, Ga., will put new engine and other machinery in their flour mill.

The company previously mentioned as working up a woolen mill project in Knoxville, Tenn., has been incorporated as the Knoxville Woolen Mills; capital $100,000, all subscribed. Incorporators are C. J. McClung, C. M. McGhee, E. J. Sanford, J. D. Cowan and R. P. Gettys. Work on buildings will probably commence about May 1st. It is probable that the Hiawassee Woolen Mills, capital $80,000, will be consolidated with the new company, making two mills under one management.

A narrow guage road is to be built from Bristol, Tenn., to Big Moccasin Gap.

H. A. Haralson, of Selma, Ala., has received an offer from Northern capitalists to put $200,000 into a new cotton mill, provided the business men of Selma will raise an equal amount. Negotiations are pending.

A large lime factory is to be started at Belton, Texas.

The Darlington Hotel Co. has been organized to build a hotel at Darlington, S. C.

A. J. Chambers, Fort Worth, Tex., is organizing a $50,000 tannery company.

The Virginia & Western Railroad has been fully organized to build a road through Botetourt and Craig counties in Virginia. J. H. Figgat, of Fincastle, Va., is one of the directors.

Incorporated—The West Virginia Boom Co., of Guyandotte, W. Va.

Simpson's mill and Cochran's mill, both at Rockmart, Ga., were washed away by high water.

L. R. Hapgood, Otter Creek, Fla., will build a box factory.

A machine shop will be started in Winchester, Ky.

The Ohio Silver Mining Co. has been incorporated in West Virginia; capital $100,000. Office in Gallipolis, Ohio.

The Brenham Ice and Refrigeration Co., capital $30,000, has been organized in Brenham, Texas, to purchase and operate the ice factory in that city now owned by C. H. Lawrence.

Pittsylvania county, Va., will build a $12,000 jail.

A meeting of the stockholders of the Washington, Cincinnati & St. Louis Railroad was organized at Harrisonburg by the election of the following officers: President, Archer N. Martin, New York; directors, C. E. Kimball, New York; H. D. Cooke, Washington, and U. L. Boyce, J. W. F. Allemong and J. S. Loose, Virginia. Energetic work will be commenced on the road early in May. This road will traverse one of the richest mineral and timber sections of Virginia.

The Selma & Tennessee River Railroad has been organized at Selma, Ala., with Hugh Haralson as president.

Sweeney & Cunningham, Lancaster, Ky., will build a tobacco factory.

H. B. Marksburg, Lancaster, Ky., will enlarge grain elevator.

Edward McDowell, Spartanburg, S. C., and Dr. N. Seymour will work a gold mine near that town.

Feagans & Haines, Charlestown, W. Va., will rebuild their milll, ately burned.

Incorporated—the Belton Ice Co., Belton, Tex.; capital $10,000.

James A. Gray, Winston, N. C., has prepared plans for the $20,000 Methodist church to be built in that town.

M. Morgan, Laurel Hill, N. C., will add new building to his cotton factory and put in weaving machinery.

BURNED.

Isenberg Paper Mill, Louisville, Ky.; loss about $20,000.

Saw and grist mill of Hicks & Buckhard, at Wickliffe, Ballard county, Ky.

Works of the King Gin and Machine Co., Montgomery, Ala.; loss $18,000.

THE new city of Sheffield, Ala., about which we have had considerable to say, is attracting great attention in all parts of the country. It is everywhere admitted that it must soon become one of the most important industrial centres of the South, and a growth equally as rapid as Birmingham's of late years, it seems to us, may be predicted for it. An advertisement in this issue of the MANUFACTURERS' RECORD calls attention to the auction sale of lots at Sheffield to take place May 8, and also gives some points as to the advantages of its location.

LOCKWOOD, GREENE & CO.
MILL ENGINEERS
Office, 65 Westminster St., Providence, R. I.
Carefully prepared plans, specifications and estimates furnished for the construction, equipment and organization of new mills and the revision and improvement of old.

MANUFACTURING.

Subscribe to the Baltimore Manufacturers' Record. Price $3 per year.

BALTIMORE.

MESSRS. W. J. CLARK & BRO., manufacturers of hydrants, N. Holliday street, have just received several large orders from firms in the city, and have enquiries from the South which will result in orders as soon as the weather is settled.

MESSRS. JAS. MURRAY & SON, machinists, Nos. 40 to 44 York street, have enough work to keep them going for some time. They are doing a considerable amount of work on brick-making machinery, and orders are still coming in. They have a large force, and business looks very encouraging.

MR. JAMES BATES, the well-known builder of elevators, corner Pratt and President streets, is continually shipping his patent elevators to the South, as well as fitting up new buildings in this city with them. He issues a descriptive catalogue, which will be sent free to any one desiring it.

MESSRS. E. J. CODD & Co., foundry and machine works, 255 S. Caroline street, report business as very good, having sufficient orders for repair work to keep their force employed, and have prospects for considerable new work.

THE Maryland Improved White-Wash Co., N. Holliday street, report that since commencing business they have had a liberal trade from the city and the South. Their business in a short time has increased to such an extent as to compel them to increase their force. They now have on hand a number of orders, large and small, for present and future delivery.

AT the warerooms of Mr. Philip R. Vogel, Jr., dealer in metal and metal goods, No. 79 German street, can be seen a full and varied assortment of a fine line of brass, copper and German silver wire, sheets, tubing, etc. He reports his business as increasing, especially his Southern trade.

MESSRS. JOHN C. FROELICH & Co., general machinists, Thames street, have enough work on hand to keep them going for some months. They have received contracts for building several tug boats in addition to the steamship mentioned some time since.

MR. F. H. FOLSOM, millwright and mechanical engineer, No. 18 East Falls avenue, has just completed a large job of work for a mill in the South, and has received contracts from others for additions, etc., to other mills in the same locality. He is also general agent for the Seidner Belt Fastener, which is becoming so favorably known, and which is claimed to be superior to any other mode of fastening belts.

IN GENERAL.

THE BRUSH-SWAN ELECTRIC LIGHT Co., Washington, D. C., have ordered a tubular boiler from John T. Coleman, of Baltimore. It will be set with the Jarvis Furnace by Mr. Joshua C. Coe, agent of that furnace in Baltimore.

WE note that the Lidgerwood Manufacturing Co. are building one of their improved reversible link-motion hoisting engines for the Lucas Coal Co., of Scranton, Pa., with a drum of sufficient capacity to hold 6,000 feet of rope. We understand that this concern make a very large line of special hoisting engines for mining purposes, and that they claim to keep finished parts of all their engines on hand at all times; so that, in case of any accident to the engine or breakage of any part, a duplicate can be furnished without a moment's delay. This is a very important point, and worth the attention of mining men. This company have sold over 2,500 hoisting engines in the past five years.

MR. MERWIN MCKAIG, proprietor of the Beal Engine, Boiler and Machine Works, Cumberland, Md., writes to us: "I am running full force and am very busy building my improved "Mogul" horizontal stationary engines, the new Keystone Roller Mills, pulleys, shafting, mill machinery, gearing and the Anderson Self-Lubricating Mine-Car Wheels. My patterns of Mogul engines range from 10-horse to 100-horse. This is a new engine that I have just put on the market, and I anticipate excellent results from it. The Keystone Roller Mill has also just been put on the market, and combines many new and valuable improvements. Received ord rs for eleven in one day. The Anderson Self-Lubricating Mine Wheels have been on the market a little over a year and they have been giving such good results that one of our largest coal companies has ordered over 500 of them, and claim that they are saving 75% of their oil."

D. MAC. M. NIVEN & Co., No. 1 Broadway, New York, represent the best gas and steam coal collieries in Nova Scotia and Cape Breton, and have made arrangements for the importation of a large quantity of the slack or culm coal produced in these collieries the present season. They are now in a position to negotiate for the sale and prompt delivery of this article during the coming season, and suggest to parties intending to purchase an early entering of their orders. The great economy in the use of fuel in connection with the Jarvis furnace is leading to its introduction in nearly every manufacturing district in the country, and will cause a general inquiry for cheap steam fuel. The principle under which this furnace is constructed gives to the screenings of gas and steam coal a special value.—*Coal Trade Journal.*

MILLER BROS., Asheboro, N. C., have just completed a very extensive flour mill.

HOWARD, BULLOUGH & RILEY, of Boston, have received orders for 6 drawing frames, 12 heads of 54 deliveries from the United States Cotton Company, Pawtucket, R. I. These frames will have the can and coiler motions and be fitted up with the Howard & Bullough Patent Electric Stop-Motion.

Philadelphia Iron Market.

PHILADELPHIA, April 21, 1884.

The careful restriction in the production of pig iron for several months past is the only thing which is now enabling makers of the standard and special brands to keep prices up, with the decided downward tendency which is in force. Everything of inferior make is declining, and only in the best grades is any firmness to be seen. Consumers of pig iron here seem determined to get stocks at concessions, but the stronger companies are holding their ground, having only moderate stocks. Inferior irons are selling at cost in a great many cases. Quotations for pig iron range all the way from $19.50 to $21 for No. 1 foundry; $18.50 to $19.50 for No. 2, and $17.50 to $18.50 for Gray Forge. Buyers seem to be afraid to buy, and are providing, as usual, for current requirements only. Inferior irons are being freely offered, but no considerable sales are reported. Mill owners are not stocking up, as the market for finished iron is still in a very depressed condition and prices very low. Steel rails are dull and prices are declining,—a good sale being reported at a shading from $33 at mill. $33.50 to $34 are the usual prices paid for small lots. No large orders are in sight.

Nails are quite active at $2.50 to $2.60; merchant iron, 1.90 to 2 cts. nominally, but only the best makes sell at that. Western iron is offered at about 1.75, and is depressing prices for Eastern makes. Plate, tank and structural iron are being ordered in small lots for immediate use at about old figures. Old rails are quiet, on account of the difference between buyers' and sellers' views. Old tees are offered for shipment at $22, but only small lots are selling at that figure, and some at $22.50. Muck bars are selling slowly at $31.50 to $32.50. The market generally is quiet, and prices have a dropping tendency, except for best qualities. An improvement is still looked for, and will probably come, but the prediction is worn about threadbare, and nothing definite can be said as to the course of demand or prices; the consumptive requirements are large, but it may be that buyers will continue their hand-to-mouth policy of buying, and keep the market in its present depressed condition for months to come.

Louisville Iron Market.

Specially reported by GEO. H. HULL & Co., Commission Merchants for the sale of Hot and Cold Blast Pig Iron.

LOUISVILLE, KY., April 21, 1884.

The iron market continues quiet. Sales are light, with very little disposition to book orders for future delivery. Furnaces generally are firm in price.

" " Warm "	22 00@23 50

Specially reported by W. B. BELKNAP & Co., Nails, Wire, Iron, Hardware, Carriage and Wagon Goods.

LOUISVILLE, KY., April 21, 1884.

There is slightly better demand for bar iron, but the lots are very small and for immediate delivery, and go at once into consumption or serve to sort up the skeleton country stocks. The mills are pushing their product on the market with rather unusual persistency, which indicates thin order-books. Yet, while this process is going on, they all claim to be losing money, and insist that some change must be speedily effected to prevent general catastrophe. There is a good deal of complaint of poor quality and lack of finish of the iron which is sold at bottom figures, and the more careful manufacturers will not accept it without submitting it to tests and having it covered by guarantee.

Hoop iron.—There is also a slight improvement in this grade of iron, and some contracts are being made for May delivery, which indicates confidence in the present prices.

Sheet.—The heavier gauges are quiet, and large lots could probably be had at concessions. Stove-pipe, gauges 26 and 27, demand a slightly better price than they did sixty days ago.

Steel.—Tool steel is only in limited demand. The low prices made by the manufacturers seem not to have stimulated its increased use.

The season for agricultural steels is about over. These have been sold at unquestionably low figures this year.

Nails are very active. The spring demand, which was so long deferred, seems to have blossomed out all at once under the influence of the genial sun, and the present prices will doubtless hold good until the bulk of the trade is over.

We do not hear much more talk of the pool and can hardly see how it could be satisfactorily formed under the avowed intention of some of the makers to stay out, and any plan which left out the consideration of the Eastern mills would hardly succeed, as every now and then the low freights enable the latter to reach the Western and Southern markets on as favorable basis as the local mills.

The introduction of steel nails, too, would be a disturbing element in any arrangement with the iron nail mills.

Wire is still extremely scarce and firm. The trouble is not so much to get the advance as it is to get the wire. All through this country, since the floods have swept away the fences, there has been an unprecedented demand for barb wire.

Improvements in the erection of fence and a better understanding of how to treat the wire itself has rendered it more popular, besides the important economy in the saving of the country's timber.

All farm goods are moving actively and the general trade in shelf hardware is, on the whole, about as satisfactory as usual at this season.

Chattanooga Iron Market.

Specially reported by S. B. LOWE.

CHATTANOOGA, TENN., April 21, 1884.

Although prices are low, trade in nearly all lines is quite active. Several manufacturing enterprises have recently started operations in this district, and others are being organized. All in operation are running full time. We make no change in quotations:

NEW PUBLICATIONS.

THE Deane Steam Pump Co., of Holyoke, Mass., have issued their 1884 catalogue, giving illustrations and full descriptions of the various styles of pumping machinery for every variety of service; and also steam pumps, either of single or duplex pattern, suitable for all duties. The information given in this volume in relation to pumps and pumping machinery is almost invaluable to all users, in addition to which there are several pages of valuable facts and figures that will be found of much service. The catalogue can be had upon application.

WE have received from Col. Albert A. Pope, Boston, Mass., "What and Why," a finely-printed and unique little volume upon cycling matters. The contents are made up of information which will doubtless create a revolution among wheelmen, for within the pages of the book is an ocean of matter in a bucket. "Some Common Questions" are catechetically answered in the plainest and most concise language, questions with answers which give a complete history of cycling, its growth, usefulness and popularity. A chapter christened "Legal Lifts" cites every bicycle case brought before the courts, and fully explains the rights of wheelmen. The sprightly semi-humorous sketch entitled "A Preparation of Iron," with an unmistakable bicycle moral, by the author, Chas. E. Pratt, Esq., is well worth reading.

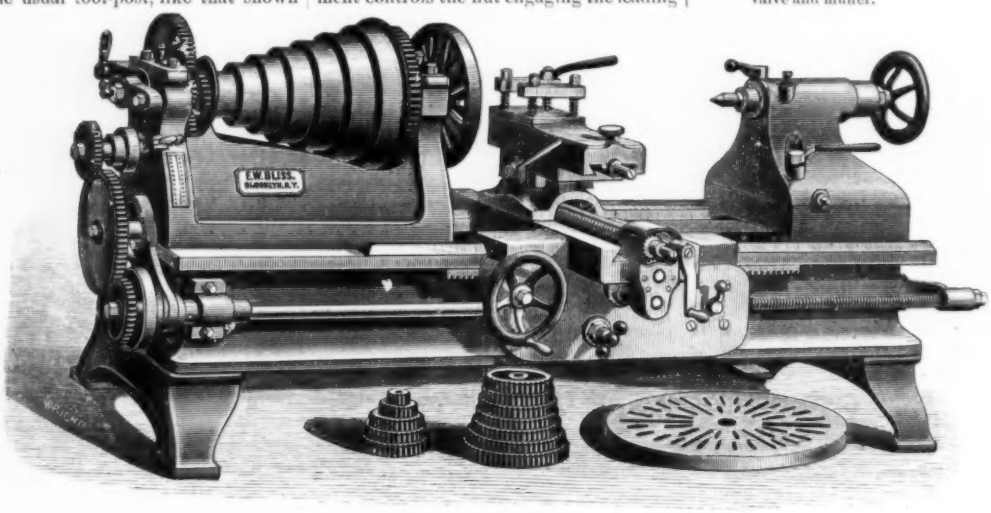
MESSRS. GOODELL & WATERS, Philadelphia, have just issued a new catalogue for 1884. It embraces a full line of woodworking machinery, together with many new and improved machines. It will be found a useful and valuable volume to mill owners, operators and others contemplating purchasing wood-working tools, to whom Messrs. Goodell & Waters will be pleased to forward a copy upon application.

THE MAGAZINE OF ART, "a richly illustrated and varied record of the beauties of ancient, medieval and contemporary art," fully merits the claims made for it as the foremost journal exclusively devoted to art in all its various departments. It should be read by everybody interested in art matters. The May number more than sustains the reputation achieved by former issues. Published by Cassell & Co., limited, New York.

Engine Lathes.

In this issue we present to our readers two illustrations of engine lathes, manufactured by E. W. Bliss, of 17 Adams street, Brooklyn, N. Y., well and widely known as a manufacturer of machinery and tools for sheet metal and special work.

These lathes embrace some new features, which we deem worthy of notice. The carriage of the 34-inch lathe can be fitted with the usual tool-post, like that shown in the illustration of the 20-inch lathe, or with clamping bars for holding the tool, as shown in the cut,—whichever may be desired,—and has compound rest, longitudinal, cross and angle feed.



ENGINE LATHES.

The tool-post is clamped to the carriage by a single screw, which is shown in the cut, on the left-hand side of the post, and the carriage can be secured to the bed when the cross-feed is in use.

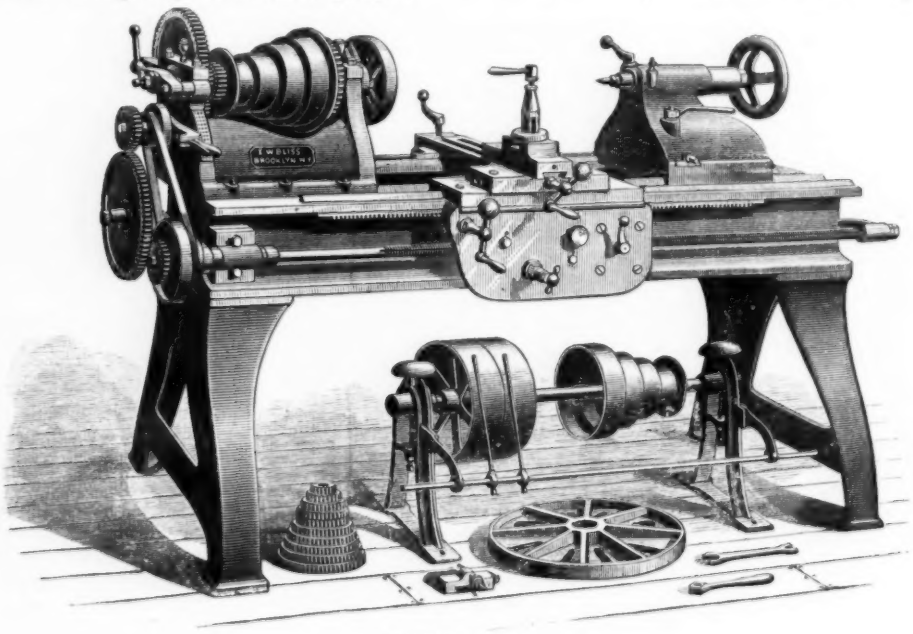
The head is geared so as to give fourteen separate speeds, and the seven steps on the cone pulley on the line spindle and the proportion of the back-gearing are arranged with the intention of providing a uniform increase of motion from the proper speed, to cut work, at the full capacity of the lathe, down to ⅜-inch diameter.

The great length and strength of the spindle, which is made of fine tool steel, are intended to give steadiness and solidity in working large pieces in the chuck or on the face-plate, when the back-centre is not in use. The dimensions of the front bearing are 4½ inches in diameter and 5 inches in length, and of the back bearing 2½ inches diameter by 5 inches long.

The 20-inch lathe is fitted with longitudinal and crossfeed, and an elevating screw in carriage to move the tool post. The cone pulley has four steps, giving eight changes of speeds, and the dimensions of the bearings are: Front bearing 2⅜ inches diameter by 4½ inches long, and back bearing 1¼ inches in diameter and 2 5-16 inches in length.

We must not omit the fact that these machines have an attachment to facilitate the cutting of screw threads. This attachment controls the nut engaging the leading threads and enables the operator to bring the tool to bear with certainty at the proper point of the work, whether the thread being cut is a multiple of the leading screw or not, and as the first cut may be accurately repeated by simply unlocking the carriage and moving it back to the starting point, the necessity of reversing is avoided, and the machine is therefore driven by a single belt.

All the working and bearing surfaces are carefully lapped and scraped, and the workmanship and materials are first-class in every respect.



ENGINE LATHES.

We may add in conclusion that these tools were designed to meet a want which Mr. Bliss had long felt during his experience in the machinery business, and with a view to avoiding the weaknesses and defects found in those of other makers.

We can confidently recommend them to those of our readers who may be in want of a tool of this character.

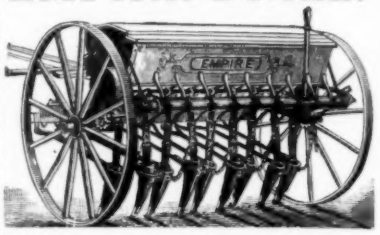
☞ If you are not already a subscriber to the BALTIMORE MANUFACTURERS' RECORD, *send us $3 and you will receive it regularly for one year or six months for $1.50.*

List of Patents.

The following patents were granted to citizens of the Southern States, bearing date April 15, 1884. Reported expressly for this paper by Louis Bagger & Co., mechanical experts and solicitors of patents, Washington, D. C.

297,055. Baughn, R. F., Lexington, Miss. Gate.
296,912. Bishop, Henry, Baltimore, Md. Advertising bird-cage.
296,811. Blair, A. J., Knoxville, Tenn. Device for forming bails for buckets.
296,920. Brannan, Wm., Fredericksburg, Va.—Fire-escape ladder.
297,066. Cole, Jos. M., Baltimore, Md. Safety-valve and muffer.
296,732. Craig, W. R., Columbia, Tenn. Cultivating harrow and scraper.
296,922. Curtice, J. M. & W. H., Louisville, Ky.—Churn.
296,932. Cussons, Jno., G'enallen, Va. Calendar.
296,938. Dees, L. C., Lake Charles, La. Dumping-wagon.
296,947. Gardner, W. T., Tarboro, N. C. Cotton-planter.
296,951. Gray, G. A., Jr., Covington, Ky. Metal-planing machine.
296,957. Hathaway, C. L., Austin, Tex. Car-coupling.
296,961. Hibner, W. T., Baltimore, Md. Cherry seeder.
296,966. Hudgens, R. H., and H. R. Allison, Laurens Courthouse, S. C. Shovel plow.
296,838. Jones, Jesse A., Raleigh, N. C. Grain crusher and disintegrator.
296,863. McMurray, Louis, Baltimore, Md. Machine for packing ensilage, &c.
296,989. Mercer, Alfonso, Norfolk, Va. Tool-holder.
296,998. Page, G. F., Baltimore, Md. Road engine.
297,087. Prunty, John E., Baltimore, Md. Automatic relief valve for steam fire engines.
297,011. Rogers, C. W., Baltimore, Md. Harness pad.
297,091. Stetzel, Frederick, Louisville, Ky. Rotary steam engine.
297,092. Stetzel, Fred., Louisville, Ky. Rotary water meter.
297,038. Vaile, C. A., Baltimore, Md. Skylight.
296,889. Tarbox, Paschal A., Louisville, Ky.—Spring motor.

EMPIRE DRILL.



With Force-Feed Fertilizer Attachment.

THE PERFECT

Towel Holder

is selling very fast in the East, and is meeting with well-merited success. This little article should be in every place where a towel is used, as it saves towels and at the same time saves trouble. We will send a sample with prices for 15 cts., or a sample dozen for $1 00.

Haff & Co., Box 24,

HARTFORD, CONN.

Patent applied for.
Cut Half Size.

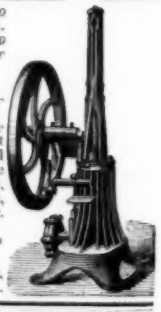
THE SOMBART PATENT **Gas Engine**

Started Instantly. No Fire to Build. No Boiler to Watch. No Engineer Required. No Coal nor Ashes. No Water Needed.

NO DANGER OF EXPLOSION!

Four Sizes, ¼, ½, ⅓ and 1-horse-power, *(Actual.)*

When stopped all expense ceases. The most convenient and cheapest Motor for small power ever made. Just the thing for *Printing Offices, Laundries, Jewelers, Saddlers, Coffee Mills, Small Shops, etc.*



Sombart Gas Engine Co.,
HARTFORD, CONN.

For sale by *Jackson & Tyler*, 16 S. Howard St., Baltimore.

SCALES,

Anvils, Vises, Portable Forges, Blacksmith's Tools, Hardware Specialties.

Send for Price-List.

Chicago Scale Co., CHICAGO.

The Herrington Potato Digger.

A potato digger that will do satisfactory work has long been needed, and many patents have been issued for machines to do this work, but it is claimed that they have very generally proved unsuccessful. One, however, has been put upon the market—the Harrington Potato Digger—which we illustrate to-day, that seems to have met all the requirements, and the most thorough tests have demonstrated its great value.

It was awarded a diploma from the Western New York Agricultural Society at Rochester, N. Y., September 30th, 1881, for a successful machine for digging potatoes, also first premium at the fairs of both Rensselaer and Saratoga counties, N. Y., and "certificates of highest merit" at New York State Fair, 1882.

The frame or enclosure which contains the machinery for operating the digger is hung on the axle of the machine. At the rear end of the enclosure the digger proper is hung at its top centre to a shaft which projects from the enclosure, which has a rapid, short, oscillating motion when in operation, which is driven by a crank and a sliding box up near the handle of the machine, which is also enclosed. The vine and weed kickers are driven with a chain belt, as can be seen.

The operator holds the handle of the machine in one hand, the reins in the other. As the machine hangs flexible, the digger can be elevated or lowered at will. When the end of a row of potatoes is reached, the operator hoists the digger out of the soil, and at the same time the vine straighteners under the poles are hoisted and held by a spring and ratchet, so that the operator has nothing to do but attend to his team until he gets into position for the next row; then he pulls the cord on top of the handle, which lets the digger and vine straighteners down ready for operation, thus digging every row in succession.

THE HERRINGTON POTATO DIGGER.

It will dig where there are heavy vines, and do good work in all kinds of soil, leaving the potatoes on top of the ground, without cutting or bruising, and in good shape for picking up. The manufacturers guarantee its work. Further particulars can be obtained from the Planters' Hoe Co., Troy, N. Y.

Col. I. W. Avery, one of the most brilliant and trustworthy journalists of Georgia, is in this city on a visit to friends and will remain with us for several days. Col. Avery has done a vast amount of splendid newspaper work, and has given powerful aid in advertising and developing the Southern country.—*Daily News*, Greenville, S. C.

Cincinnati is probably better supplied with good hotels than any other city of its size in the United States, and one of the best of them is the Palace Hotel, corner Vine and Sixth streets. Under its new management it has grown wonderfully in popularity, and it has a constantly increasing patronage. Travelers will find it about all that is to be desired in the way of a first-class hotel. ‡

The James River Valley.

Its Great Openings for Manufacturers—Combination of Good Lands, Minerals and Timber.

[Special Correspondence Baltimore Manufacturers' Record.]

In my last I adverted to the water-power of the James and its tributaries. In this letter I propose to give attention to agricultural lands in the valley and its adjacent country.

The valley proper includes only alluvial lands. It varies in width from one-eighth of a mile to a mile or more. The soil is very rich. It is especially productive in the cereals and produces the various grasses to perfection. A number of the farmers in the valley have turned their attention specially to grass and stock-raising in latter years, and have been successful in these lines of business. Dairying has been attempted since the railway was built, and the experiment goes to show that it is profitable as long as the city demand for dairy products is sufficient to insure reasonable prices. With factories and cities studding this valley, as will be seen in the course of time, this will be a great business.

Tobacco was the great staple of this valley in ante-bellum times and is now largely cultivated; but the tobacco for shipping abroad, formerly so much in demand, has lost its prestige and the brighter and lighter grades have come into demand. These grades can be raised in the higher and fresher lands on the sides of the hills and mountains, but not on the rich bottom and table lands. That, however, will prove no loss in the end, for grass and stock will ultimately prove more profitable and improving than the tobacco was. A large proportion of the river lands formerly commanded from thirty to fifty dollars per acre, including the uplands on the margin of the valley. That they do not command now more than half that much is due to the fact that many have been thrown on the market, with but few able to buy even at the reduced price. That they will regain their former values is as certain as free labor is superior to slave labor. To hasten this consummation, however, a sub-division of the large tracts is very advisable.

From Richmond to its head-waters the river runs between beautifully-sloping hills, gradually getting more precipitous as you go up stream, but seldom are they so steep as to forbid the culture of the vine. A large portion of the country is preëminently adapted to this culture, and the success in vine culture in Albemarle will have a marked effect in expediting it all along this valley.

The country is also finely adapted to raising fruits generally, but especially the apple. In Albemarle, Nelson and Amherst, the "Albemarle Pippin" has been raised to great perfection, and has proven the most high-priced apple of the continent for shipment abroad.

Improved farms in this valley and the adjacent uplands can be bought at prices ranging from $5 to $25, according to fertility and convenience to railway and other advantages.

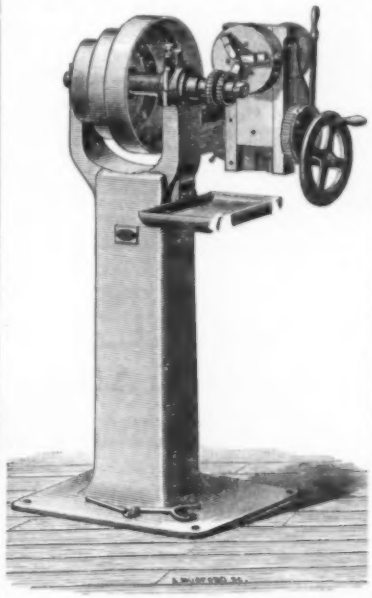
A more beautiful country is seldom if ever seen than is this valley from Richmond to the head-waters of the James. It is supplied with the best railway facilities east and west, and crossed by trunk lines running north and south. Birg.

Richmond, Va., April 16, 1884.

An Improved Nut and Bolt Head Miller.

The accompanying illustration shows an Improved Nut and Bolt Head Miller, manufactured by Dwight Slate, 262 Main street, Hartford, Conn. This machine, which has been designed by Mr. Slate, is especially adapted to straddle milling all forms of nuts, bolt and screw heads; and also to slotting screw heads. It will take in bolts from the smallest to 1¼ inches, and of any length, and will mill all sizes of nuts suitable for the same. The adjustments from one size to another can be made in two minutes.

With each machine there are furnished one pair of cutters suitable for all the above operations, (except slotting,) and a full set of gauge collars to go between the same for all sizes from ¼ to 1¼ inches inclusive, varying by sixteenths; a countershaft and all other appliances necessary for immediate operation.



IMPROVED NUT AND BOLT HEAD MILLER.

There are no fixtures to be changed; the machine is always ready and, it is claimed, will be found far superior, for the use intended, to any milling machine heretofore made, however expensive. Further particulars can be obtained from the manufacturer.

Important to Southerners.

Persons arriving in New York via Cortlandt Street Ferry, by taking the 6th Avenue Elevated Train, corner Church and Cortlandt streets, can reach the Grand Union Hotel in 42d street, opposite Grand Central Depot, in twenty minutes, and save $3 carriage hire. If en route to Saratoga or other summer resorts via Grand Central Depot, all baggage will be transferred from hotel to this depot free. 600 elegantly furnished rooms $1 and upwards per day. Restaurant the best and cheapest in city. Families can live better for less money at this hotel than at any other first-class hotel in the city. ‡

Advertisers wishing to reach the manufacturers of all classes, mining companies, steel, iron, and hardware dealers of the entire South, cannot find a better medium than the Baltimore Manufacturers' Record. We are always prepared to furnish proof of our claims as to circulation.

F. H. FOLSOM,

THE MARKETS.

OFFICE MANUFACTURERS' RECORD,
BALTIMORE, April 23, 1884.

There is nothing new to be said about trade in general, business continuing in most lines moderately fair, though there is considerable dullness in some branches.

The manufactured iron market has been quiet, with transactions small and prices generally quoted lower. We revise our figures as follows:

Ref. Bar Iron, 1 to 6x⅜ to 1	₩ lb.	1.9 @	2 c
" " 1 to 4½x⅜ to 1	"	1.9 @	2 c
" " ⅜ to 2, round and square	"	1.9 @	2 c
Hoop Iron 1½ wide and upward	"	2.8 @	3 c
Band Iron, from ½ to 6 in. wide	"	2½ @	2.6c
Horseshoe Iron	"	3.2 @	3.3c
Norway Nail Rods	"	5 @	5½ c
Black Diamond Cast Steel	"	10 @	11 c
Machinery Steel	"	4½ @	4¾ c
Spring Steel	"	3½	4 c
Common Horse Nails	"	10 @	11 c
Railroad Spikes, 5½x9-16	"	2.5 @	2.6c

The demand for pig iron remains about the same, with orders only for small lots. We quote as before, viz:

Baltimore Charcoal Wheel Iron (all Baltimore ore)	$28 00@29 00
Virginia C. B. Charcoal Wheel Iron	28 00@—
Anthracite, No. 1	21 00@23 00
" " 2	20 00@21 00
" " 3	18 00@20 00
" Mottled and White	16 00@17 00

Cincinnati Iron Market Report.

Specially reported by ROGERS, BROWN & CO., Pig Iron Commission.

CINCINNATI, April 21, 1884.

A very quiet market has been experienced throughout the entire Western and Northwestern market. Buyers have placed car-load or one hundred-ton orders to even up stock and keep their foundries and mills running, but have shown no disposition to make larger purchases. There is little or no pressure to sell from the leading furnaces, as most of them are largely oversold, and for several weeks have been embarrassed from inability to keep up with running contracts and fill new orders. No concessions in prices have been made on standard grades, although the tone of the market is weaker. If prices should, in consequence of the depression, adjust themselves on a lower level, more furnaces will be blown out in the near future. It is not believed that business would be increased in volume to any extent if prices were reduced $1 per ton all round, as the prevailing feeling is towards restricting business to a minimum basis until certain elements in situation, such as crop prospects, tariff legislation and the course of events at the speculative centres, are more fully settled. We quote for cash f. o. b. Cincinnati:

HOT-BLAST FOUNDRY.

" " Malleable	24 50@25 50

Specially reported by E. L. HARPER & Co.

CINCINNATI, April 21, 1884.

The business of the past week has been much more active, prices having touched such a low stratum that buyers feel quite secure in prevailing figures. While in some round-lot transactions some furnaces have made slight concessions, the tone of the market is stronger than a week ago. Were the uncertainties of the issues between the proprietors of foundries and mills and their employees removed, and the disturbing political agitation suppressed, a feeling of comparative satisfaction would prevail, and a brighter outlook be safely indulged. We quote as prices current:

	Four Months.

Iron, par.

Richmond Iron Market.

Specially reported by ASA SNYDER, dealer in Scotch and American Pig Irons.

RICHMOND, VA., April 21, 1884.

The iron trade has developed no new features since last report. It continues in the same old rut, *i. e.*—Sales of small lots for immediate wants. Prices as follows:

PIG IRONS.	
No. 1 Scotch Pig Iron	$23 00@25 00
No. 1 Anthracite	22 00@22 50
No. 2 Anthracite	20 00@22 00

Richmond Refined Bar Iron, ₩ lb	—@ 2
Horse-Shoes, (Tredegar,) ₩ keg	—@ 4 00
Mule-Shoes, (Tredegar,) ₩ keg	—@ 5 00

HARDWARE.

Since our last issue prices have remained nominally steady, with a fair amount of business, orders being mainly for small lots, and then only to supply immediate wants. The most activity is, of course, in such season goods as are indispensable. Some dealers think that prices generally are at the bottom, and that any change in the future must be towards higher figures. In the meantime, however, considerable cutting is being done, and especially by Philadelphia dealers, who are offering goods to the retail trade in the South at about the same price as to jobbers. Baltimore dealers, of necessity, have to meet the cutting in prices made by their rivals in other cities.

Standard door springs are now quoted at 50 and 10 off, instead of 50%, and German silver spoons at 40%, instead of former discount.

Nails are in fair supply, with orders much smaller than had been anticipated and prices still quoted at $2.50 to $2.60, according to quantity. The views of a Wheeling nail manufactnrer, as given in our last issue, predicting a dull nail market this year, and greater production than consumption, appear to about coincide with the ideas of some of our local dealers. Certain it is that the expected spring boom in orders for nails has not yet put in its appearance. The Western nail manufacturers have formed a pool to restrict production and maintain prices, but whether they will be successful or not remains to be seen.

THE SARANAC HORSE NAIL COMPANY, Plattsburg, N. Y., in common with very many first-class manufacturers of goods for the hardware trade, report a volume of trade for February and up to the middle of March exceeding by over 200 per cent. the record of these two months for any year in the history of their large business. As an index of the way their nails are received in the West and Southwest a glance at their order book for the past fifteen days of March showed orders as follows: To one house in St. Louis, twelve tons; Galveston, Tex., four and a half tons; Knoxville, Tenn., five tons; Rio de Janeiro, South America, two tons; Baltimore, Md., two tons; Houston and Belton, Tex., two tons; Wheeling, W. Va., one ton; one New York house, four and a half tons. Very many smaller orders had been booked from the West, which would run the aggregate very much larger. This company have within the past year added new machinery and otherwise made improvements which have nearly doubled their capacity for manufacture.

CONFIDENTIAL CREDITS.

Ealy's "Blue Book," just published, contains the names, address, financial standing and paying qualities of over **150,000** dealers in **Hardware, Iron, Metals, Machinery, Cutlery, Guns, Stoves, Brass Goods, Machinists, etc.**, in the United States and Canada.

This is a new list, having been carefully compiled within the past three months by over **20,000** Special Local Correspondents and Merchants in the Trade, at an Expenditure of Many Thousands of Dollars. It is as complete and reliable in every particular as any Reference Book for determining Credits can be made, and is much more convenient than a larger Agency book, as the "Blue Book" is Condensed, being confined exclusively to the above-mentioned lines of trade.

We have reliable and active local correspondents in every city, town and village, in the United States and Canada, and can furnish subscribers with late and full written reports regarding the character, habits, ability and financial worth of their customers.

The "Blue Book" is published twice a year. Terms of subscription made known on application to either of our offices.

POINTS OF INFORMATION

IN REFERENCE TO THE PROPOSED

Great Iron Manufacturing City

—OF—

SHEFFIELD,

ALABAMA.

LOCATION.

1st. Sheffield is located in Colbert county, Alabama, on the South bank of the Tennessee River, and at the head of navigation of said river. The bluffs upon which the city will be built are over 100 feet high, with occasional depressions, which furnish good drainage and first-class facilities for boat landings. The site for the city is beautiful beyond comparison.

2d. The country around for miles is a fertile agricultural region. The grasses, clover, grain and cotton growing to great perfection.

COAL AND IRON.

South of the city site at a distance, almost continuously, at from 18 to 60 miles, the most extensive beds of coal and iron exist in quantities inexhaustible and of the finest quality.

3d. A broad-guage railroad is now being rapidly constructed from the centre of the city site through this great coal and iron field to Birmingham, Alabama.

4th. The sale of lots in the proposed City of Sheffield will begin on the 8th of May next, and lots will be sold at public auction to the highest bidder. Terms: one-fourth cash; balance, 1, 2 and 3 years, with 8 per cent. interest.

5th. A large force is now engaged laying off and grading the streets and avenues.

6th. Sheffield is a very desirable place for Wholesale Merchants to locate, because they will have water transportation from all points on the Tennessee and Mississippi Rivers and their tributaries, and will have railroads running South, East and West, over which to distribute their goods and wares.

7th. The Railroad Company owns a large per cent. of the City Company stock, and, as a matter of interest, will give merchants located there reasonable rates on all freight.

8th. It will be an especially favorable place for Retail Merchants, because there will be thousands of dollars paid out weekly by the City and Railroad Companies in prosecuting their enterprises, and by people who will be erecting buildings, furnaces, machine shops, &c.

9th. The shops of the Railroad will be located in the City.

10th. Arrangements are being made to build several large iron furnaces at once.

11th. Boats will carry pig iron to St. Louis at about $1 per ton. The present rates from Birmingham to St. Louis are about $3.55 per ton.

12th. Iron can be made as cheaply at Sheffield as at Birmingham.

13th. The health of the place is superb. No chills, fever or miasma exist there.

14th. The climate is good—being a medium between the extreme cold of the Northern States and extreme heat of the Southern States.

15th. Building material is cheap and abundant. Fine brick clay and rock quarries on the property. Lumber and timber at convenient distances.

Route to Reach Sheffield.

Parties desiring to visit Sheffield will stop at Tuscumbia, Alabama, on the Memphis and Charleston Railroad, which is about three miles from Sheffield. Conveyances can be had to accommodate parties wishing to prospect. The Railroad will be running to Sheffield about the 1st of May. Hotel accommodations at present at Tuscumbia.

16th. A Hotel Company is now being organized with a large capital to erect a first-class Hotel at Sheffield.

For further information address

W. S. GORDON,

President Sheffield Land, Iron and Coal Co.

Tuscumbia, Ala.

Office and Works, No. 42 N. HOLLIDAY STREET, BALTIMORE, MD.

Remington Standard Type-Writer

THE STANDARD WRITING MACHINE OF THE WORLD.

It much more than takes the place of the pen, as it does the work of two or three penmen, and much more neatly and legibly. The business man will appreciate this saving of valuable time. Dictate your correspondence, etc., to a Type-Writer operator and have your time and strength for other matters. (Perfect press copies obtained in same way as of pen writing.)

Again the Type-Writer is well-nigh indispensable to overworked professional men. It is a complete relief from the strain of pen-writing.

Lawyers have their papers written with the Type-Writer. Many copies can be made at one time, (absolute duplicates) thus multiplying speed.

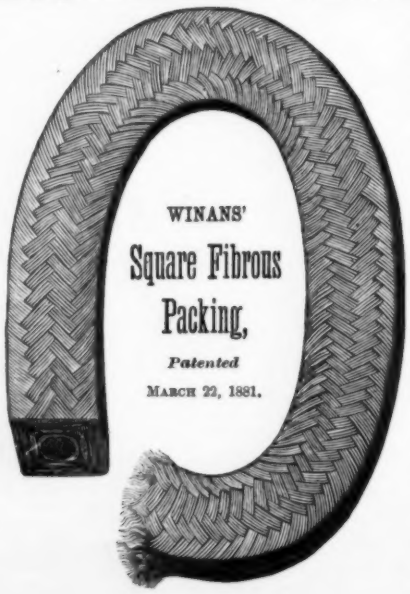
Clergymen write their sermons with the Type-Writer, and hence can read them in a dim light.

Authors, journalists and others compose directly on the machine. It facilitates composition, as the manipulation becomes purely mechanical, and owing to its greater speed the mind does not lose its freshest and best thoughts, as when waiting for the slow pen to catch up. In use throughout the world. Perfect satisfaction guaranteed. Send for illustrated pamphlet, with testimonials.

WYCKOFF, SEAMANS & BENEDICT, 281 and 283 Broadway, New York.

Winans' Packing Mfg. Co.

SOLE MANUFACTURERS.



408 BLEECKER ST.,
NEW YORK.

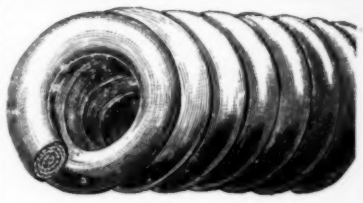
Manufacturer of the

SELDEN PATENT PACKING



FOR

ENGINES and PUMPS.

This packing is used by the largest Engine and Pump Builders, as well as in Mines, Mills and Steamship Lines, and is kept in stock by Supply Houses throughout the country. There are two styles of this packing, the "Plain" and the "Rubber Core." ENGINEERS will be satisfied of its superiority after once using; and DEALERS will find it a *salable* article. In ordering please specify which is desired.

Asbestos Wick for Globe Valve Stems. Square Hemp and Flax Packing.

THE E. M. BIRDSALL COMPANY, AUBURN, N. Y.

Manufacturers of

TRACTION and PORTABLE STEAM ENGINES.

—UNSURPASSED—

FOR

Power, Light Weight, Economy in Fuel and Water, Efficiency, Simplicity and Durability.

The Traction Engines are furnished with Birdsall's Patent Driving Wheel, which is made expressly for soft or muddy roads; they are warranted to travel and take a load on roads that are too soft to be used by any other traction; are very simple; easily managed; better made and made of better material and decidedly the best finished engine in the market. A prize will be given to every farmer who tries them and does not find by experience that they are not excelled by any and superior to most.

THE TRACTION ENGINE.

—UNSURPASSED—

FOR

Power, Light Weight, Economy in Fuel and Water, Efficiency, Simplicity and Durability.

APRON and VIBRATING THRESHING MACHINES, embodying superior points of excellence and merit peculiar to themselves and possessed by none others, are built expressly for heavy work, and have unusually large separating and cleaning capacity; are matchless in strength, beauty of design and finish, and can be operated by any one of ordinary intelligence, owing to their extreme simplicity and solidity; are capable of taking care of all the grain that can be gotten to them, and in a superior manner.

The Novelty Saw Mill is the only mill in the world built on truck wheels, and is gotten up on entirely different principles from any other. The cutting is done with the under side of the saw and with the grain of the wood instead of against the grain as in all other mills, thus saving largely in power required to drive the saw; they are gotten up expressly for light power, and are warranted to run with from ¼ to ½ less power than any mill built; a ten-horse engine gives excellent power for them, and will handle the heaviest timber to the best advantage. They can be set up ready for operation while the steam is being raised on the engine; and they will pay the owner on small jobs, owing to their portability, that will not pay on any other mill. They make excellent lumber; are easily managed, and with our Ten-Horse Traction or Portable Engine will cut from 3,000 to 5,000 ft. of lumber per day, according to the size of the logs and skill of the operator.

JOHN G. MENGEL & CO.
Type Founders and Electrotypers,
No. 31 German Street, near Calvert,

WE take pleasure in calling the attention of our patrons, Printers, Newspaper Publishers, and the public in general to the removal of our establishment to the above desirable location. Our business has outgrown our present quarters, and we have fitted up three entire floors of this large and commodious building in the most complete manner for the execution of our work, having added to our already extensive facilities all the latest and most appoved machinery that can be used in the manufacture of TYPE, ELECTROTYPING, BRASS RULE, and the GENERAL PRINTERS' SUPPLY business, making it now by far the best equipped establishment of this kind in the city. We manufacture a line of beautiful Book and Newspaper Type, and use a superior metal in the manufacture of same, which we will furnish at very low prices, and guarantee satisfaction.

JOHN G. MENGEL & CO., 31 GERMAN ST.

Bates' Hand Elevators.

THE BRADSTREET

MERCANTILE ✠ AGENCY

HAS NOW BEEN

Under its present successful management for the past seven years,

And during that time its business has more than trebled, while its facilities have proportionately increased.

No expense is considered too great in obtaining and applying to the conduct of the business all possible improvements. With its present system for obtaining and promulgating information, this Agency is justly regarded by its patrons as authority on all matters affecting commercial credit. Its ramifications are greater and its business larger than any similar organization in the world conducted in one interest and under one management.

You are respectfully invited to investigate, and, if in need of an Agency, to test its ability to serve you.

CHAS. F. CLARK, President.

The True Idea of Assurance.

Women's Mutual Insurance and ACCIDENT COMPANY.

PRESIDENT.
ELIZABETH B. PHELPS.

VICE-PRESIDENT,
MARGARET HOLCOMBE.

FANNY M. GERARD, Treas. ELIZABETH S. ROBERTS, Secy. CORNELIA KAMPING, Actuary.

MEDICAL EXAMINERS.

ALF'D K. HILLS, M. D., 465 Fifth Avenue. MARY PUTNAM JACOBI, M. D., 110 W. 34th St.

JOHN A. KAMPING, Attorney and Counsel, 128 Broadway, New York.

The Company is incorporated under the Laws of New York, approved by the Supreme Court and Superintendent of the Insurance Department, and subject to the latter's supervision.

ITS OBJECT

is *surely* and *cheaply* to provide an indemnity for loss by death and accidental disablement.

ITS PLAN

consists in assessing the members ratably according to age in the Life Class, and according to occupation or degree of risk in the Accident Class whenever a loss in either class occurs. In other words, the actual losses only are paid by the policy holders, which thus secures *insurance at cost.*

ITS MEMBERSHIP

comprises persons between the ages of 16 and 67, of approved physical condition. The Life Class is separate and distinct from the Accident Class, members being liable for losses only occurring in the class to which they belong. This company, having been organized for the purpose of removing the prejudices which created discrimination in Life Insurance against women, has adopted the broad principle of *no discrimination in membership on account of sex.*

ITS SAFETY AND SECURITY

consists in its economical system, its certainty of solvency, (for it incurs no risk but what the members may discharge by one Assessment,) and its SECURITY RESERVE FUND, which in time, it is calculated, will make a member's membership self-sustaining.

ITS RATES OF ASSESSMENT

are safer than those adopted by others, and are no more expensive.

FINALLY,

This company confines itself to the legitimate business for which insurance has been accorded protective and encouraging legislation; it proposes to adhere strictly to business principles in its management, and to establish the fullest protection to its members in a manner the *simplest, cheapest* and *most complete* of any organization of equal safety. Membership may be acquired by letter. Apply to

ELIZABETH S. ROBERTS, Secretary.

283 Fourth Avenue, New York.

This Company requires Agents in every city, town and village, to whom liberal terms will be given. Address as above.

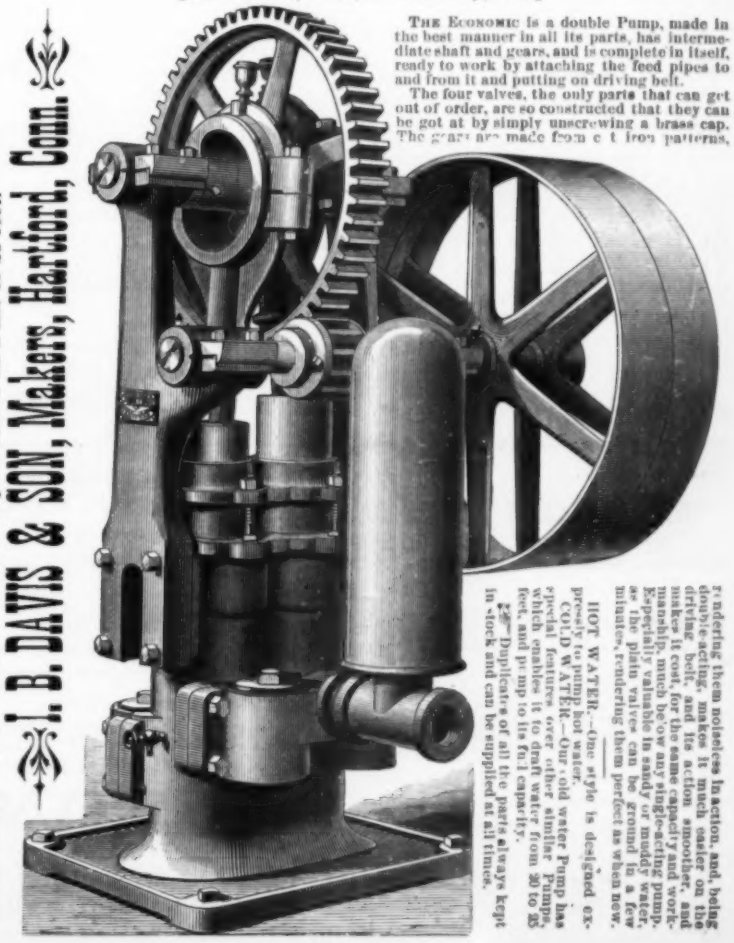
THE ECONOMIC PATENT

Boiler Feed Pump

[Patented May, 1879, and February, 1883.]

NOTE.—Every one of our Cold Water Pumps is tested on a lift of 23 feet.

J. B. DAVIS & SON, Makers, Hartford, Conn.



THE ECONOMIC is a double Pump, made in the best manner in all its parts, has intermediate shaft and gears, and is complete in itself, ready to work by attaching the feed pipes to and from it and putting on driving belt.

The four valves, the only parts that can get out of order, are so constructed that they can be got at by simply unscrewing a brass cap. The gears are made from cast iron patterns, rendering them noiseless in action, and, being double-acting, makes it much easier on the driving belt, and its action smoother, and makes it cost, for the same capacity and workmanship, much below any single-acting pump. Especially valuable in sandy or muddy water, as the pistn valves can be ground in a few minutes, rendering them perfect as when new.

HOT WATER.—Our style is designed expressly for pumping hot water.

COLD WATER.—Our cold water Pump has special features over other similar Pumps, which enables it to draft water from 20 to 25 feet, and pump to its full capacity.

☞ Duplicates of all the parts always kept in stock and can be supplied at all times.

NAYLOR'S

PATENT

CYLINDER CUP,

Patented Oct. 9, 1883.

CHEAPEST

AND BEST

Cylinder Lubricator

YET INVENTED.

Possesses advantages superior to all others. Will feed any clean oil, whether heavy or light.—Can be regulated to feed from 5 to 50 drops per minute. Only one valve to operate and only one connection to make. Cannot clog nor freeze. Every cup tested and guaranteed.

There is no expense in adopting this cup. No pipes nor valves necessary. It is the simplest cup in the market. There is nothing complicated about it.

NICE LIGHT CYLINDER OIL, 50 Cts. per Gallon.

AGENT FOR:

Forbes & Curtis' Patent Pipe Cutting and Threading Machine. A boy can cut and thread pipe to 6 inches. Will send one to any responsible person on 10 days trial.

Lightning Screw Plates, Bolt Cutters, Fine Taps and Dies, Green River Drilling Machines, Punching Presses, Tire Upsetters, Tire Benders, and other Labor-Saving TOOLS.

CAREW'S PATENT WIRE CUTTER.

These goods have recently been greatly improved. They are now made throughout of

Forged Steel.

The advantage of this cutter is seen at a glance. The adjustable jaws are its main feature. These are made of the best tool steel, and are brought to a keen cutting edge before being tempered. The cutting quality is unsurpassed. Whenever they become dulled by use, they can easily be removed, by driving from the end showing prick-mark, ground, and as easily replaced. This may be repeated as often as expedient; or they can be replaced by duplicate jaws, thus obviating the necessity of purchasing new cutters. **Five sizes—6, 8, 10, 12 and 14 inch.**

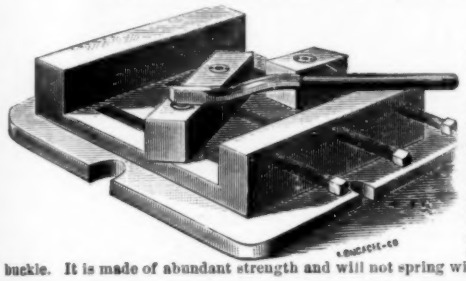
Bonney Vise and Tool Co. [LIMITED.]

—MANUFACTURERS OF—

Bonney's Patent Vises, Machinists' Tools AND Hardware Specialties,

3015 CHESTNUT ST., PHILADELPHIA.



North's Improved Planer Vise

We herewith present to the trade a new Planer Vise,—the improvement consisting of a sectional movable jaw in three pieces, each piece being separately adjusted, enabling it to hold irregular or tapering pieces as firmly as straight ones. Each section of jaw is held in place by a heavy steel screw passing through its centre, the head of screw moving in slots cast in the bottom. By placing the sections against the work to be held and tightening the nut in centre of section with the wrench (as shown in cut) before tightening up the set screws, you overcome all tendency of the work to buckle. It is made of abundant strength and will not spring with the severest use.

ESTABLISHED 1845.

The Oldest Saw Manufactory in the South.

TOLAND & SON, 85 N. Front St., Baltimore.

Particular attention paid to Large Circular Work. We warrant our Small Circular Saws to stand more strain, without buckling or cracking, than any other make. We make all kinds of Saws,—Ensilage, Feed, Meat Choppers, and other knives made to pattern, warranted equal to the **Best Forged Knives**, and CHEAPER.

N. B. We make no charge for hammering any Large Circular Saw that we can't make "go."

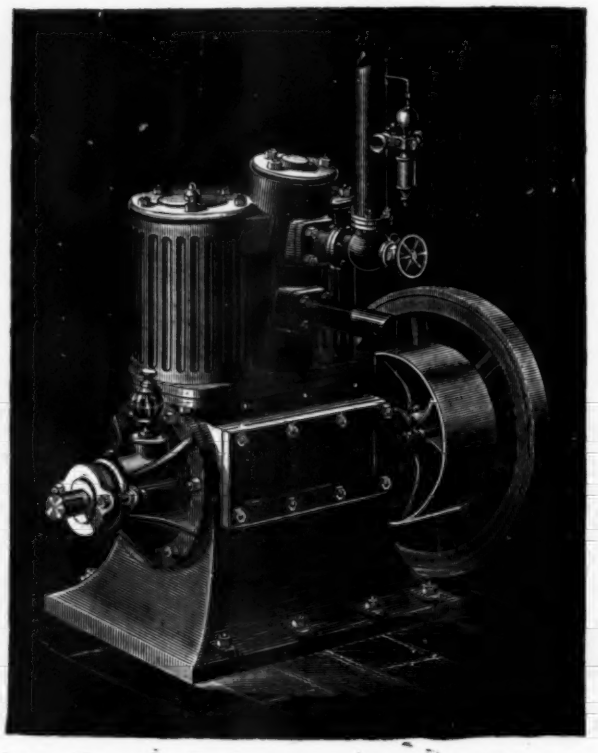
THE Westinghouse Automatic Engine
Over 600 Engines Now in Use. Average Sales, 1,200 H. P. Per Month.
[REAR VIEW, WITH ONE FLY-WHEEL REMOVED.]



The Westinghouse Automatic Engine has no equal in sensitive and close regulation, low cost of maintenance and general convenience; and in all other essential features of a FIRST-CLASS ENGINE it is guaranteed to have no superior.

Occupies the least space and saves half the cost of foundations. All sizes built strictly to gauge and parts interchangeable. Every engine tested to full power before leaving the shop. Our Engines are largely used in cotton, silk, hosiery and woolen factories; paper mills; rolling mills; oil mills; saw and planing mills; grist and roller mills; plaster mills; stamp mills; for cotton ginning; electric lighting; draining and irrigation; and as a relay to deficient water power; also for fast steam yachts and tugs. Especially adapted to coupling direct to line shafts, roll trains, beaters, and all kinds of special machinery. ☞ Send for Illustrated Circular and reference list, and state the horse-power required. ☞ Our prices are moderate.

COOKE & CO.
22 Cortlandt Street, NEW YORK.

SALES AGENTS AND DEALERS IN
General
Machinery AND Supplies.

THESE ENGINES are manufactured with great care, from the best materials, and the workmanship is of the best quality, all the parts being fitted in a thorough and workmanlike manner.

The Steam Joints are scraped and ground to a perfect bearing, thus obviating the annoyance of gum or paper joints.

The Shaft, Piston Rod, Valve Rod, and Cross-head Pin, are made of forged steel. The Cross-head is fitted with composition gibbs, that are adjustable (to take up the wear.) The piston is fitted with spring rings. All the moving parts are evenly balanced, thus assuring steadiness and smooth running.

These engines are finely finished and the parts are made interchangeable. They are all that good work and good material can possibly make them.

The engine is furnished with Boiler on same base when called for.

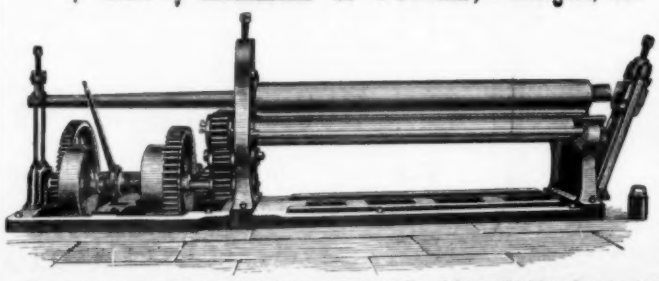
BRONZE SHEET METAL.

Patent Plate Bending Rolls,

Made by HILLES & JONES, Wilmington, Del.



THIS CUT REPRESENTS ALL SIZES THAT ARE DRIVEN BY BELTS.

It is out the work of a moment to balance the top roll and lower the hinge housing to take out the plate when a full circle is bent. The rolls are all made of solid wrought iron, the balance bar being a part or extension of the top roll. There is a cast-iron bed plate under the entire machine. To save any shifting of belts we put in Friction Pulleys, which enable the rolls to be started, stopped or reversed instantly.
